INSTRUCTIONS FOR AUTHORS

Manuscripts may be submitted electronically, either on a MS-DOS disk or by e-mail (to make sure your message arrives safely, leave no lines longer than 80 characters). Papers should be in $\LaTeX$ format, using the standard article document class, i.e.,

\begin{verbatim}
\documentclass{article} 
\usepackage{} % Please include any local package you are using
\author{} % Here insert the authors name and the address
\title{} % Here insert the title
\date{} % this must be left empty
\begin{document}
\maketitle
\begin{abstract}
................
................
.................. % Here comes the body of the text
..................
\end{abstract}
\begin{thebibliography}{11}
\bibitem{}
\bibitem{}
\bibitem{}
\end{thebibliography}
\end{document}
\end{verbatim}

The manuscript should also contain one or more key words which describe the important concepts of your paper, as well as *Mathematical Reviews* classification numbers of your work.

Graphics files can be included in either $\LaTeX$ character graphics format or in PostScript format. To include PostScript files in your document, we prefer the macro commands in the \texttt{epsfig.sty}.
