INSTRUCTIONS FOR AUTHORS

Manuscripts may be submitted electronically, either on a MS-DOS disk or by
e-mail (to make sure your message arrives safely, leave no lines longer than 80
characters). Papers should be in \textsc{latex} 2ε format, using the standard article
document class, i.e.,

\begin{verbatim}
\documentclass{article}
\usepackage{} % Please include any local package you are using
% Here insert the authors name and the address
% Here insert the title
\begin{document}
\maketitle
\begin{abstract}
\end{abstract}
\begin{thebibliography}{11}
\bibitem{}
\bibitem{}
\end{thebibliography}
\end{document}
\end{verbatim}

The manuscript should also contain one or more key words which describe the
important concepts of your paper, as well as \textit{Mathematical Reviews} classification
numbers of your work.

Graphics files can be included in either \textsc{latex} character graphics format or in
PostScript format. To include PostScript files in your document, we prefer the
macro commands in the \texttt{epsfig.sty}.
