CONTENTS

Fatemeh Abtahi
Pseudo-contractibility Of Weighted $L^p$–Algebras ......................... 5

Murat Adivar, Youssif N. Raffoul
Necessary and sufficient conditions for uniform stability of
Volterra integro-dynamic equations using new resolvent equation .. 17

Ahmed Anber, Soumia Belarbi, Zoubir Dahmani
New Existence and Uniqueness Results for
Fractional Differential Equations ........................................... 33

Alireza Khalili Asboei, Seyed Sadegh Salehi Amiri,
Ali Iranmanesh, Abolfazl Tehranian
A new characterization of $A_7$ and $A_8$ ............................... 43

Grigore Călugăreanu, Lavinia Pop
Between Morphic and Hopfian ............................................... 51

Mircea Cimpoeaș
Stanley depth of squarefree Veronese ideals ......................... 67

Silvia-Otilia Corduneanu
Almost Periodic Solutions for Some Convolution Equations ....... 73

Judicael Deguenon, Alina Bărboișcu
Attachment Observability of a Rotating Body-beam ................ 81

Xiang Gao, Qiaofang Xing, Rongrong Cao
Estimates on the non-compact expanding gradient Ricci solitons ... 95

B. J. Gardner
Radical Classes Closed Under Products .............................. 103

Orhan Gurgun, Sait Halicioglu, Abdullah Harmancı
Quasipolar Subrings of $3 \times 3$ Matrix Rings ......................... 133

Muhammad Ishaq
Monomial ideals of minimal depth ....................................... 147
Nguyen Van Luong, Nguyen Xuan Thuan
Coupled points in ordered generalized metric spaces and application to integro-differential equations ............... 155

D. R. Merlusuca
A duality-type method for the obstacle problem .............. 181

Najma Abdul Rehman
Harmonic Maps on Kenmotsu Manifolds ......................... 197

Ali Olgun, H. Güllence, Fatma Taşdelen
Kantrovich Type Generalization of Meyer-König and Zeller Operators via Generating Functions ..................... 209

Inayatur-Rehman, Muhammad Shah,
Tariq Shah, Asima Razzaque
On existence of nonassociative LA-ring ......................... 223

Jesús A. Cerda Rodríguez, Gioia Failla, Mustapha Lahyane,
Israel Moreno-Mejía, Osvaldo Osuna-Castro
Rational Surfaces with Anticanonical Divisor not Reduced ..... 229

M. G. Sarabia, J. Nava L., C. Rentería M., E. Sarmiento R.
Parameterized Codes over Cycles ................................ 241

Katarzyna Szymańska-Dębowska
On two systems of non-resonant nonlocal boundary value problems .................................. 257

Luigia Di Terlizzi, Anna Maria Pastore
$\kappa$-manifolds locally described by Sasaki manifolds........ 269

Apoloniusz Tyszka
A new characterization of computable functions............... 289

Letiția Velcescu
Distribution of Time Interval between the Modifications of Result Sets Cardinalities in Random Databases ........ 295
