Homology theory in the AST II Basic concepts, Eilenberg-Steenrod's axioms

Comment.Math.Univ.Carolinae 33,2 (1992) 353-372.

Abstract: Homology functor in the spirit of the AST is defined, its basic properties are studied. Eilenberg-Steenrod axioms for this functor are formulated and established.

Keywords: alternative set theory, set-definable, homology theory, simplex, complex, Sd-IS of groups
