***Remarks on extremally disconnected semitopological groups***

Comment.Math.Univ.Carolinae 43,2 (2002) 343-347.

**Abstract:** Answering recent question of A.V. Arhangel'skii we construct in ZFC an extremally disconnected semitopological group with continuous inverse having no open Abelian subgroups.

**Keywords:** extremally disconnected and maximal spaces, semitopological group, Stone-Čech compactification

**AMS Subject Classification:** Primary 54H11; Secondary 54C05, 54G15
