ISSN 1201-561X

THEORY AND APPLICATIONS OF CATEGORIES

Volume 25, 2011

A category of quantum categories
Dimitri Chikhladze 1

A remark about the Connes fusion tensor product
Andreas Thom 38

Remarks on punctual local connectedness
Peter Johnstone 51

Comparative smootheology
Andrew Stacey 64

Monoidal functor categories and graphic Fourier transforms
Brian J. Day 118

Reflective-coreflective equivalence
Erik Bdos, S. Kaliszewski, and John Quigg 142

An embedding theorem for adhesive categories
Stephen Lack 180

Model-categories of coalgebras over operads
Justin R. Smith 189

A small observation on co-categories
Peter LeFanu Lumsdaine 247

© The Editors of Theory and Applications of Categories 2011. Permission to copy for private use granted.

Higher categorified algebras versus bounded homotopy algebras
David Khudaverdyan, Ashis Mandal, and Norbert Poncin 250

Symmetry and Cauchy completion of quantaloid-enriched categories
Hans Heymans and Isar Stubbe 276

Towards a homotopy theory of higher dimensional transition systems
Philippe Gaucher 294

Covariant presheaves and subalgebras
Ulrich Höhle 342

On involutive monoidal categories
J.M. Egger 368

The Faà di Bruno construction
J.R.B. Cockett and R.A.G. Seely 394

Semidirect products and crossed modules in varieties of right Ω-loops
Edward B. Inyangala 426

Yoneda theory for double categories
Robert Paré 436

Flows: cocyclic and almost cocyclic
Michael Barr, John F. Kennison, and R. Raphael 480

Countable meets in coherent spaces with applications to the cyclic spectrum
Michael Barr, John F. Kennison, and R. Raphael 508

On reflective-coreflective equivalence and associated pairs
Erik Bdos, S. Kaliszewski, and John Quigg 533

Differential restriction categories
J.R.B. Cockett, G.S.H. Cruttwell, and J. D. Gallagher 537

Symbolic dynamics and the category of graphs
Terrence Bisson and Aristide Tsemo 614

THEORY AND APPLICATIONS OF CATEGORIES (ISSN 1201-561X) will disseminate articles that significantly advance the study of categorical algebra or methods, or that make significant new contributions to mathematical science using categorical methods. The scope of the journal includes: all areas of pure category theory, including higher dimensional categories; applications of category theory to algebra, geometry and topology and other areas of mathematics; applications of category theory to computer science, physics and other mathematical sciences; contributions to scientific knowledge that make use of categorical methods.

Articles appearing in the journal have been carefully and critically refereed under the responsibility of members of the Editorial Board. Only papers judged to be both significant and excellent are accepted for publication.

Full text of the journal is freely available in .dvi, Postscript and PDF from the journal's server at `http://www.tac.mta.ca/tac/` and by ftp. It is archived electronically and in printed paper format.

SUBSCRIPTION INFORMATION. Individual subscribers receive by e-mail abstracts of articles by e-mail as they are published. To subscribe, send e-mail to `tac@mta.ca` including a full name and postal address. For institutional subscription, send enquiries to the Managing Editor.

INFORMATION FOR AUTHORS. The typesetting language of the journal is TEX, and LATEX 2_ε is strongly encouraged. Articles should be submitted by e-mail directly to a Transmitting Editor. Please obtain detailed information on submission format and style files from `http://www.tac.mta.ca/tac/`.

Managing editor. Robert Rosebrugh, Mount Allison University: `rrosebrugh@mta.ca`

TEXnical editor. Michael Barr, McGill University: `barr@math.mcgill.ca`

Assistant TEX editor. Gavin Seal, Ecole Polytechnique Fédérale de Lausanne: `gavin_seal@fastmail.fm`

Transmitting editors.
Clemens Berger, Université de Nice-Sophia Antipolis, `cberger@math.unice.fr`
Richard Blute, Université d' Ottawa: `rblute@uottawa.ca`
Lawrence Breen, Université de Paris 13: `breen@math.univ-paris13.fr`
Ronald Brown, University of North Wales: `ronnie.profbrown(at)btinternet.com`
