

## CONTENTS

### LECTURES

#### **Francesco Calogero**

ISOCHRONOUS SYSTEMS .....	<b>11</b>
Introduction .....	11
Lecture 1 .....	11
Overview .....	11
Isochronous Systems are not Rare .....	13
Examples .....	16
Lecture 2 .....	21
The Goldfish .....	21
Lecture 3 .....	29
A Novel Technique to Identify Solvable Dynamical Systems, and a Solvable Extension of the Goldfish Many-Body Problem .....	29
The Technique .....	29
Extended Goldfish .....	31
An Alternative Approach .....	35
Equilibrium Configurations of the Isochronous Models, Small Oscillations and Diophantine Relations .....	37
Additional Remarks .....	41
Lecture 4 .....	43
Isochronous PDEs .....	43
Notation and Preliminaries: The Trick .....	43
Examples .....	44
Periodicity in the Space Variable .....	56
References .....	58

#### **José F. Cariñena and Arturo Ramos**

LIE SYSTEMS OF DIFFERENTIAL EQUATIONS AND CONNECTIONS IN FIBRE BUNDLES .....	<b>62</b>
1. Introduction: The Nonlinear Superposition Property .....	62
2. Lie Systems in Lie Groups and its Homogeneous Spaces .....	66
3. Lie Systems as Connections on Bundles .....	68
4. The General Riccati Equation .....	72
5. Applications of Lie Systems in Supersymmetric Quantum Mechanics	74
References .....	76

**Vladimir S. Gerdjikov**

BASIC ASPECTS OF SOLITON THEORY .....	78
1. Introduction .....	78
2. Direct and Inverse Scattering Problems for $L$ .....	81
3. The RHP and the Inverse Scattering Problem .....	90
4. The Generalized Fourier Transforms for Nonregular $J$ .....	102
5. Fundamental Properties of the MNLS-Type Equations .....	111
6. Discussion .....	121
7. Conclusions .....	121
Acknowledgements .....	122
References .....	122

**Jan Jerzy Ślawianowski**

SEARCH FOR FUNDAMENTAL MODELS WITH AFFINE SYMMETRY: SOME RESULTS, SOME HYPOTHESES AND SOME ESSAY .....	126
1. Introduction .....	127
2. Dynamical Models, Affine Invariance .....	128
3. Field Equations, Conservation Laws, Identities, Constraints .....	136
4. Special Solutions, Group-Space Vacuums .....	144
5. Cosmology, Spinors, Dark Matter .....	152
6. Kaluza–Klein Aspect .....	160
7. Search for Spherical Solutions .....	163
8. Some Mechanical Comments .....	170
Acknowledgment .....	171
References .....	171

CONTRIBUTIONS

**Omar Cherbal, Mustapha Maamache and Mahrez Drir**

NONADIABATIC GEOMETRIC ANGLE IN NUCLEAR MAGNETIC RESONANCE CONNECTION .....	175
--	-----

**Peter A. Djondjorov and Vassil M. Vassilev**

SYMMETRIES AND CONSERVATION LAWS OF PLATES AND SHELLS INTERACTING WITH FLUID FLOW .....	183
--	-----

<b>Sergey V. Golovin</b> SYMMETRY APPROACH AND EXACT SOLUTIONS IN HYDRODYNAMICS .....	191
<b>Georgi G. Grahovski, Vladimir S. Gerdjikov and Nikolay A. Kostov</b> ON THE MULTI-COMPONENT NLS TYPE EQUATIONS ON SYMMETRIC SPACES: REDUCTIONS AND SOLITON SOLUTIONS ....	203
<b>Marina Grebenyuk</b> CONNECTIONS ASSOCIATED WITH LINEAR DISTRIBUTIONS .....	218
<b>Mariana T. Hadzhilazova and Ivaïlo M. Mladenov</b> A MATHEMATICAL EXAMINATION OF SQUEEZING AND STRETCHING OF SPHERICAL VESICLES .....	231
<b>Rolf-Peter Holzapfel</b> DIMENSION FORMULAS FOR AUTOMORPHIC FORMS OF COABELIAN HYPERBOLIC TYPE .....	240
<b>Azniv Kasparian and Rolf-Peter Holzapfel</b> ARITHMETIC PROPORTIONAL ELLIPTIC CONFIGURATIONS WITH COMPARATIVELY LARGE NUMBER OF IRREDUCIBLE COMPONENTS .....	252
<b>Assen Kyuldjiev, Vladimir Gerdjikov, Giuseppe Marmo and Gaetano Vilasi</b> ON SUPERINTEGRABILITY OF THE MANEV PROBLEM AND ITS REAL HAMILTONIAN FORM .....	262
<b>Remi Leandre</b> GALTON–WATSON TREE AND BRANCHING LOOPS .....	276
<b>Predrag M. Rajković, Sladjana D. Marinković and Miomir S. Stanković</b> FINDING THE ZEROS OF THE FUNCTIONS TREATED BY $Q$ -CALCULUS .....	284
<b>Sergey Yu. Vernov</b> SINGLE-VALUED AND MULTIVALUED SOLUTIONS FOR THE GENERALIZED HÉNON–HEILES SYSTEM WITH AN ADDITIONAL NONPOLYNOMIAL TERM .....	297

<i>Subject Index</i> .....	<b>311</b>
<i>E-mail Addresses</i> .....	<b>313</b>
